

Key Questions

What can you see in the sky?
What do you think it is?
Have you ever been on an aeroplane? Where did you go?
What else flies in the sky?
What do you already know about Space? What would you like to find out?

Overview

We will be carrying out our own flying experiments.
We will be talking about places we have travelled to - how we got there and what it was like.
We will be sharing a range of Space stories and talking about differences and similarities between where we live.
We will be finding out about our planet and the solar system and talking about some differences and similarities.
We will be learning how we can look after our planet.

Up up and away!

Space training camp

Outcomes

Children will create art work and models using a range of media.
Children will be able to identify and talk about where they live and recognise similarities and differences.
Children will be able to carry out a simple science experiment.
Children will learn and perform new space themed songs.

As a parent you can: Encourage your child to look up at the sky at different times in the day and talk about what you can see and how it changes. Talk about journeys you've been on, how you travelled and what was the same or different to life at home.
